Guide for System Center Management Pack for Advanced Threat Analytics Library

This guide was written based on version 1.7.1.1 of the Management Pack for Advanced Threat Analytics Library.

Guide History

Update this table for every release of the management pack guide. List the changes to the GUIDE, not the changes to the management pack. Changes to the management pack are listed in the “Changes in Version <version number>” section below.

Release Date	Changes
June 7, 2017	Original release of this guide

Supported Configurations

This management pack requires System Center Operations Manager 2012 R2 or later. A dedicated Operations Manager management group is not required.

The following table details the supported configurations for the Management Pack for ATA Library:

Configuration	Support
Advanced Threat Analytics	1.7 1.7.1 1.7.2
Clustered servers	Not Tested
Agentless monitoring	Not Tested
Virtual environment	Yes

Prerequisites

The following requirements must be met to run this management pack:

- System Center Operations Manager 2012 R2 and later must be installed prior to running the management pack.
- The ATA Center and Gateway application must be installed prior to running the management pack.

Files in this Management Pack

List all downloadable files that are part of the management pack .msi and indicate whether they are optional or required.

The Management Pack for ATA Library includes the following files:

- Microsoft.AdvancedThreatAnalytics.Library.mp

Management Pack Purpose

This Management pack defines the base objects for the other ATA 1.7.1.1 management packs. There are no discoveries, rules, monitors or reports contained in the Management Pack.
